

## BELL LABORATORIES, INC PRODUCT

### 1. **Contrac<sup>®</sup> (Rodenticide)**

1) Compositon

Bromadiolone 0.005 %

2) Properties

Formulated with more than 5 special mix of human food and has thin paraffin layer. Contrac remained good and has aroma in dry and wet areas.

3) Indications

Control Norway mouse (*Rattus norvegicus*), roof mouse (*Rattus rattus*) and house mouse (*Mus musculus*). Contrac does not directly kill the mouse, Because the active substance works slowly/chronic. According to mouse behavior that can save memory for 6 months, chronic toxic is ideal to control the mouse.

4) Dosage and Application :

Day	Action	Description
1	Put Contrac in bait station	Distance 10 – 15 m
3	Check contrac in bait station – Empty – Add double – Decrease – refill	<i>Over population</i> Normal population
10	Check contrac in bait station Recheck contrac every week for 6 – 8 weeks	Population decrease > 90 %

Use Plastic glove when put the block of Contrac in “bait station”. Avoid handle the block of contrac directly with hand because it will make mouse avoid the bait.

5) Packaging

1 Kg and 20 kg
